A close-up photograph of a person's hand holding a pen, pointing at a computer monitor. The monitor displays a green area chart with a line graph overlaid, showing data trends over time. The background is blurred, showing other monitors in a data center or office setting.

**Tackle data storage,  
maintenance and  
visibility challenges,  
one warehouse at a time.**

## **WHAT'S EFICAZ?**

Lera's Eficaz - DW Suite has evolved from an efficient ETL suite to a complete DW suite to cater to the organization's requirement of a strong base for reporting and maintenance of data. Now all your key data can be stored and made available for consolidated reporting, analysis and dashboards.

# SYSTEM ARCHITECTURE

## FEATURES

- It is built exclusively for T24 TM (seamless integration)
- Web based GUI – ease of monitoring
- Multiple types of normalized output - (multi-value, sub-value)
- Incremental & full extraction
- DB reconciliation, file data validation & string truncation
- Field level control of extraction (select from branches and tables)
- Schedule extractions (daily, weekly, time-based, etc.)
- Prioritized extractions
- Customize extractions with Plug-ins (external APIs)
- Extract to flat files and/or database
- Load to multiple target databases with a single extraction

## BENCHMARKS

Offload reporting requirements to 3<sup>rd</sup> party tools and gain the maximum advantage as under

1 Billion records in a single cycle

5 minutes for 1 million customer records

15 minutes for 2.6 million GL entries

25 hours for 470 million STMT.ENTRY Records
